Death is the permanent, irreversible cessation of all biological functions that sustain a living organism. Brain death is sometimes used as a legal definition of death. The remains of a previously living organism normally begin to decompose shortly after death. Death is an inevitable, universal process that eventually occurs in all living organisms. Death is generally applied to whole ...

No ego. Don't defend a point to win an argument or double-down on a mistake. You are not your work; you don't have to defend your point. You do have to search for the right answer with help from others. In a GitLab Unfiltered interview, GitLab Head of Remote Darren M. adds context on this sub-value.

For human beings, the self is what happens when "I" encounters "Me." The central psychological question of selfhood, then, is this: How does a person apprehend and understand who he or she is? Over the past 100 years, psychologists have approached the study of self (and the related concept of identity) in many different ways, but three central metaphors for the self repeatedly emerge ...
