To clear the codes turn key on , put left turn signal on and set parking break. I don't remember how the buttons read on the right side of the wheel, but you hold the on cruise on button and if I remember right the lower half of the right button at the same time. That should change the Odo display to the code display.

### How do you clear codes? - Tow411

If the feature is turned off or the fault is removed, the trouble code will be moved to the "previously active" list and the code will end with a "P". For example: when the work light is turned on and there is an open an active circuit fault code (611 14 11 1 A) will be logged. When the light is turned off the code will become previously active.
