Advice from a Chemistry Tutor: Identifying the Unknown ...

In this lab we will focus on using Solubility Tests, Chemical Tests and Spectra Analysis to identify two unknown compounds. Overview:

Download Free Identifying

In this experiment, you will combine both spectroscopy and qualitative tests to identify an unknown organic compound. For this experiment, the possible categories of the unknown are alkane, alkene, alkyl halide, alcohol, phenol, amine, aldehyde, ketone, and carboxylic acid. Each compound will

Three Unknown ...

Identification of Unknowns Lab. In this experiment, your goal is to separate and identify two solid organic compounds - an alcohol and a ketone. When you come to lab, you will be given a vial which contains a 1:1 mix of a solid alcohol and a solid ketone. Column chromatography is the method that you will use to separate them.
