Planet Earth: Freshwater Video Questions by Amy Kirkwood | TpT

Freshwater is vital for life, supporting ecosystems and human civilizations. We use freshwater in many aspects of daily life including food production, power generation, manufacturing, and sanitation. However, it is becoming increasingly threatened. Although the Earth's surface is two-thirds water, less than three percent is fresh.

Freshwater | National Geographic Society

Although merely 3% of water on earth, fresh water plays an important part in the planet's weather and erosion. It is immensely important for all non-marine wildlife, which drinks fresh water and swims, procreates, hunts in it. Its concentrations, such as rivers, lakes and swamps, abound in aquatic and other species, often adapted to 'wet' life.
