Wildfires | Running During Wildfires

5. Run slowly at first. This part of the program has not changed in the decade since it was developed. During your first days of running, your running pace should be only slightly faster—or exactly the same speed—as your walking pace. The number one thing that derails people who are hoping to be runners is the feeling of not having enough air.

Runner's World | Australia and New Zealand

Brands have refined the lightweight running shoe by analyzing stride and gait, using impact measuring devices, and constructing shoes to encourage natural form instead of correcting it. Flexible knit uppers, bouncier midsoles, and more subtle tweaks like widened toe boxes and lower-drop platforms are all innovations that have created the present-day lightweight trainer.
