## **Sedimentation engineering (Book, 1975) [WorldCat.org]**

Sedimentation is the tendency for particles in suspension to settle out of the fluid in which they are entrained and come to rest against a barrier. This is due to their motion through the fluid in response to the forces acting on them: these forces can be due to gravity, centrifugal acceleration, or electromagnetism.. In geology, sedimentation is often described as the opposite of erosion, i ...
