Easy Step System - Boat Trailer Steps - Home | Facebook

This is a very small capacity system. This is not designed to meet the needs of a large household. It is designed for a small travel trailer and two people. To maximize the life of this mini system, do not put anything in the septic system except water, human waste, and toilet paper. Otherwise, you may have to pump the upper drum once a year or so.

This step is quite simple and is repeated on every instructable and website related to capturing rainwater. In simple terms your harvesting potential is the surface area you have available to collect from (typically a roof) multiplied by your annual precipitation. 100 m2 roof in an area that receives 1 000 mm of rain per year ==> 100 m3 of harvesting potential.
