Introduction to projects and solutions - Visual Studio ...

To improve performance when opening large solutions, Visual Studio 2019 introduced solution filtering. Solution filtering lets you open a solution with only selective projects loaded. Loading a subset of projects in a solution decreases solution load, build, and test run time, and enables more focused review. The following features are available:

Load a subset of projects - Visual Studio | Microsoft Docs

Visual Studio has two kinds of project organization file formats: projects and solutions. Solutions are essentially groups of projects. Most software applications involve more than one project, and so virtually every software application has a solution file organizing said projects.

Using Multiple Solutions in Visual Studio | Blog

In this article, we looked at a simple example of running a solution created in Visual Studio 2019 community edition in Visual Studio Code. This was a simple console application and there would certainly be more configuration required for more complex applications and for debugging.

Running A Visual Studio 2019 Solution In Visual Studio Code

A new solution may be created in many ways in VS.NET. The simplest is to create a new project—by default, Visual Studio .NET will create a new solution with the same name as the project, placing the solution files [] in the same directory as the project. Although this works fine for small projects, it isn't well suited to more complex applications.

1. Solutions and Projects - Mastering Visual Studio .NET ...

Newer versions of Visual Studio are also much better optimized for opening large solutions. To further improve the performance of Visual Studio and reduce build times, you can also consider using the Filtered Solutions feature of Visual Studio 2019 to reduce the number of projects open when working on a particular module.

This extension mainly makes scoped Solution Explore view (create by New Solution Explorer View in context menu in Solution Explorer) persistent across solution unload and load (ie. it saves state when Visual Studio shutdown and restores it when solution is opened next time).

Multiple Solution Explorer Tools - Visual Studio Marketplace

We're trying to press them to unify all referenced code in to a single solution, but we're getting some resistance - specifically they keep talking about interdependence between modules (read "projects" in Visual Studio) being increased if everything is placed in a single solution file. None of the code in the separate solutions is used elsewhere.
